**Subject:** RE: Comprehensive Sustainability and Resilience Analysis RFP

Good Morning,

Thank you for your interest in the Comprehensive Sustainability and Resilience Analysis RFP. Responses to your inquiry are in red text following each question below.

- Can you provide more feedback on what is intended by a framework that is scalable? For example, is that intended to be from the project-scale to corridor-scale to system-scale? Or from asset-level by hazard to multi-hazard/multi-asset analyses? **The framework should be focused on project-scale to corridor-scale to system-scale.**
- Is it correct that a report that frames how to do the analyses (including with what data is available, what stressors are of greatest concern to consider in an analysis, what resources can inform the analysis, etc.) but does not ask the consultant team to complete the analysis? **The consultant should complete the analysis as well.**
- Is it possible to share an anticipated budget for this effort? **No**
- Is there an estimated period of performance for this project? **The contract will be for one year 12/15/22 – 12/31/23**
- Who will use this report to conduct analyses (aka, the primary audience)? **The report will be mainly used by the MPO, TxDOT, and local governments.**
- Is there specific expertise within the team that is required and will be used in the scoring process? **No**
- Are there any concerns for multi-firm partnerships for the proposed team? **Consultant may use subconsultants in performing the study, but consultant shall be responsible for directing the work of authorized subconsultants, and for any compensation due to subconsultants**

Once again, thank you for your interest in the Comprehensive Sustainability and Resilience Analysis RFP .
